Building Organizational Concept 'A1'

Building Organizational Concept 'A2'

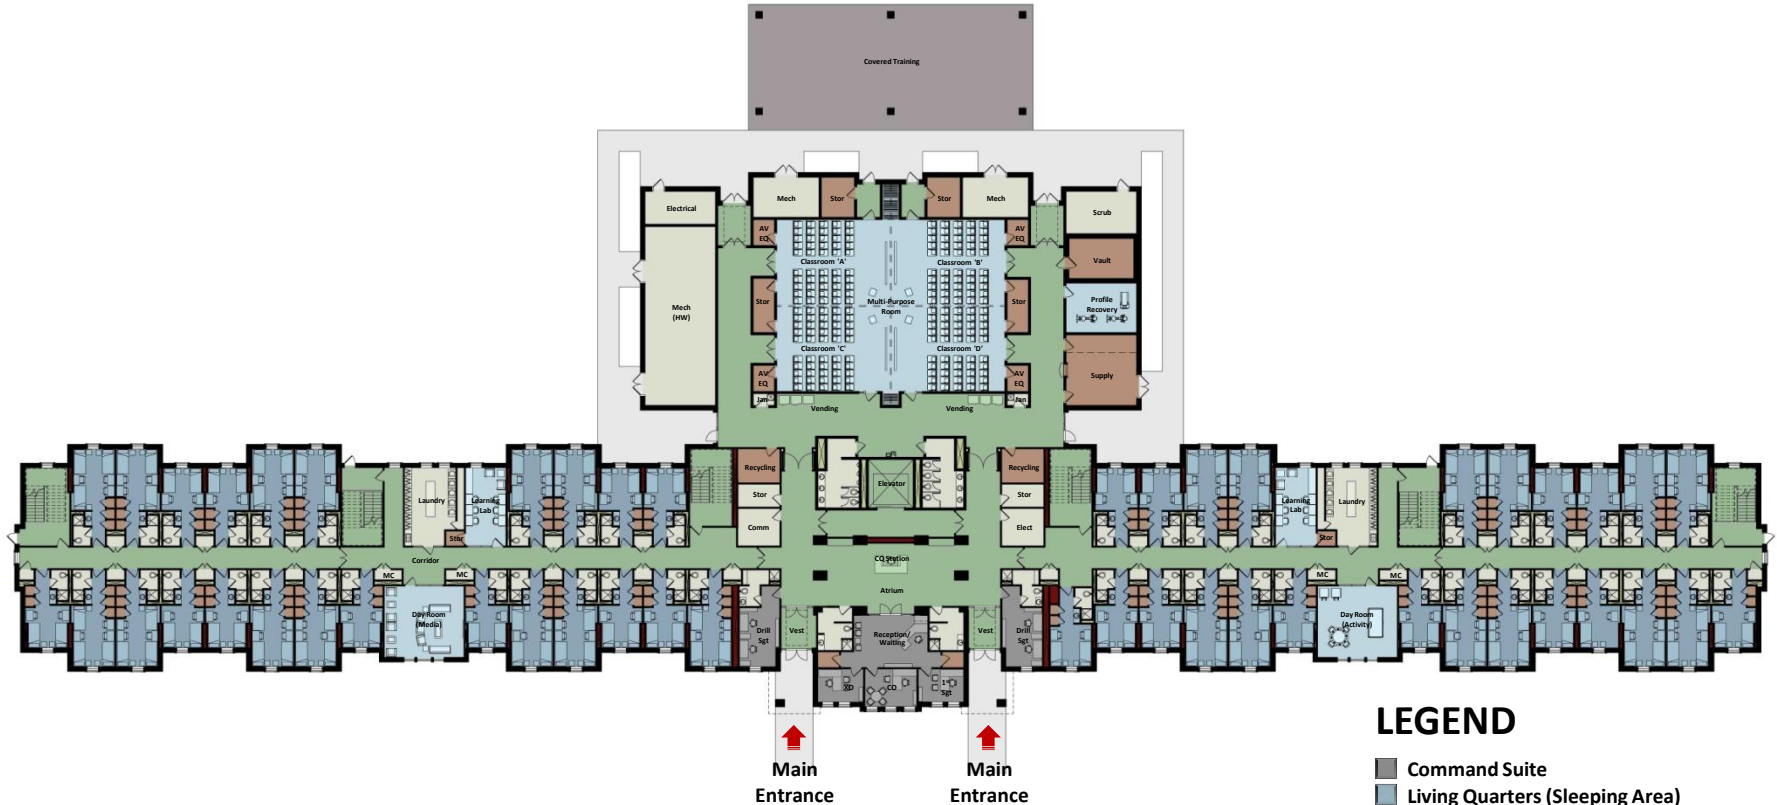

Building Organizational Concept 'A3'

### Standardization and Sustainability

- 1 The Standardization of Building Program Components advances the concept of 'Standardization'
- 2 The Trainee Support Module can be reorganized to serve as a transitional space to support multiple 'Building Organizational Concepts'
- 3 These 'Building Organizational Concepts' will provide Installations with the ability to consider multiple site configurations in the development of their Installation Master Plan
- 4 This additional level of 'Standardization' will provide the opportunity to select a 'Building Organization Concept' and Site that consider building orientation and placement minimizing site development costs while addressing sustainability requirements to maximize day-lighting and energy efficiencies
